

GOT MILK INTOLERANCE? GET A2

Some people who have reactions such as *stomach upset, congestion, migraines, sore joints, rash, and ear infections* when they ingest standard milk* can enjoy milk or milk products that are predominately A2 without experiencing any discomfort.

.....

Some people with *Crohn's, Colitis and Irritable Bowel Syndrome* can consume milk and milk products that are predominately A2.

.....

Some people with *Autism* benefit from milk and milk products that are predominately A2.

.....

Some people with *Type 1 Diabetes* have found that milk and milk products that are predominately A2 have less impact on blood sugar levels.

.....

* Standard Canadian cow's milk contains predominately A1 Beta Casein, a milk protein to which some people have a sensitivity. But some cows produce A2 Beta Casein, as do goats and many other mammals, including humans. Milk from Golden Guernsey cows, is predominately A2.

Eby Manor Ltd. does not claim that Golden Guernsey Milk will benefit all people who have milk intolerances.
